

Why Use Natural Soap?

Many people don't realize that most of the bars and body washes in stores aren't actually soap— they're detergents. While detergents are a water softener that strip everything away, even the good stuff, soaps have a more exact purpose: removing just the dirt.

Natural soaps are super effective at cleaning your skin without adding extra chemicals or preservatives for your body to break down.

We at Donum a Terra specialize in plant based soaps. For thousands of years, people have used plants for food and good health. We also like them because they're gentle on the skin and work for all skin types.

They truly are gifts from the earth.

About Us

We are a small, web-based company from Jacksonville, Florida, founded early 2013. As a dynamic family of soap sellers, we work hard to provide people with quality artisan soaps. Our vision is to create products that bring you back to basic ingredients given to us from the Earth.

We at Donum a Terra want to offer people an easy, creative, and more efficient alternative to chemical-laden, store bought detergents with our plant-based soaps. We wish to be that beginning for anyone who's tired of harmful, synthetic chemicals that fail to clean efficiently and wants to simplify their lives with a natural approach. Each soap has top quality ingredients, both grown in house and purchased from highly reputable sources.

Our Main Ingredients are Quality & Consciousness

We believe in the power of plants and their natural abilities, and it's reflected in our soaps.

All of our soaps are plant based.

The herbs we use are either organically grown in our own gardens or purchased certified organic or wild harvested.

Our oils and butters are also organic and raw, with little to no processing.

We make our own organic nut milks and nut butters. Even the lye we use is food grade, and is commonly used in the process of making pretzels, olives, and chocolate.

Color, Scent & Design — Every Bar Has Its Own Personality

All of our soaps are made from original recipes, with careful planning and countless hours of research to bring you the best bars.

We only use essential oils, or extracts from plants, for fragrance. No synthetic scents here!

We make our own scent blends too. It's important to us to offer a great variety of blends in order to find the right combination for you.

Also keeping with our plant based theme, our colorants are also plant extracts.

Every batch we make is luxurious without losing that handmade feeling. We offer a variety of soaps intended for and every occasion.

Ordering & Shipping Info

Ordering from us is simple and easy. All orders are processed online, through our online store or, if

additional help is required, through e-mail. We are happy to help pick the right soap for you!

Our soaps are wrapped and shipped in breathable, non-toxic packaging.

We process orders daily, using USPS Priority Mail.

If you need an order sooner, please e-mail us or fill out the contact form on our site before placing the order so we can charge the appropriate shipping amount.

Handmade Soap Care

Tips and Tricks for Making the Most of Your Natural Soap

Do's

- Allow bar to dry out in between each use
- Store in a place that will let water drain away from the bar
- Instead of taking the entire bar into the bath or shower, cut the bar in half or into thirds
- Our soaps are intended for hands, face and body, so use them anywhere: in the bath and kitchen

Don'ts

- Don't let the bar sit in water after use or it will deteriorate faster
- Though our soaps are meant for all skin types, don't continue to use the bar if you experience irritation
- Since this is real soap, be extra careful to not get soap into eyes, as it will cause stinging and irritation; rinse thoroughly with water if this occurs

For Hair

We do offer a bar for hair! Current users of shampoo and other hair products might experience a period of "shampoo detox" when switching over to our hair soap. This is because your scalp is getting rid of the residue non-natural hair care products and the environment leave behind. Rest assured, our soap is hard at work getting your hair and scalp clean. Hair soap is purposely made softer for hair, so we recommend cutting your bar into smaller pieces to prolong its use. Apply the bar in sections on head by rubbing it on your scalp. After that, use the tips of your fingers and massage soap throughout your scalp and hair. Don't use finger nails to scratch scalp.
